A new contonment building, allegedly to house the flight control station, was under construction at the northwest corner of the taxivey. A guarded fuel dumm which was lighted at eight was in a small woods in the southeast corner of the field.

7. It Col Shechkov, CO of the field, ordered the Parchim labor office to immediately send workers to the field when there were heavy snowfalls, so that the ruhway and taxiway could be cleared.
